What are the financing and investment targets?

The CCFN Board has currently approved three financing windows in line with its operational scope;

1. Minimum Support Package (MSP),
2. Human Wildlife Conflict (HWC) and
3. Payment for Ecosystem Services (PES).

For the MSP a long-term financing and gap analysis was conducted based upon a 15 year projection that would sustain the minimum requirements of up to 100 communal conservancies in Namibia.

These funding requirements will be covered through the creation of an endowment fund of approximately US$33 million to permanently cover essential programmatic support costs and a sinking fund of approximately US$ 17 million to cover the remaining critical and on-going development support costs over the initial 10 years.

Our heartfelt appreciation to the following organisations for their continued support of the CCFN:
Why do we need the Community Conservation Fund of Namibia?

It has long been recognised that an imperative need for the CBNRM Programme is a reduction of its dependence upon period bound external donor funding support in favour of more long term sustainable financing instruments.

In response to this, the establishment of the CCFN has created a sustainable finance framework for a suite of important long-term support services to conservancies and community forests to ensure continued success of the Programme.

The scope of the CCFN is to continually fund critical support services (Minimum Support Packages) to communal conservancies, and eventually, community forests whilst also supporting key conservation matters that arise from time to time e.g Human Wildlife Conflict and championing new and innovative financing models in conservation in Namibia.

Objectives

The primary objective of the CCFN is to **raise, administer, manage, grow and disburse** funds to promote the sustainable development of communal conservancies, community forests and related natural resource management entities with a similar legal mandate that contribute to:

a. conservation, protection and improvement of the natural environment and biodiversity, including the sustainable use of natural resources; and

b. relief of poverty and the improvement of livelihoods for the benefit of the members of communal conservancies and community forests.

Legal and Operational Status

The Community Conservation Fund of Namibia was registered on the 14th of July 2017 as a Non-Profit Association Incorporated under Section 21 of the Namibian Companies Act. It is governed by the Companies Act, and its Articles of Association. It is further guided by By-laws, a Strategy Plan and various Internal Operations manuals and policies.

Governance and Management

Patroned by Hon. Nandi Ndaitwah the organisation was founded by Namibians from different walks of life.

It is governed by a well balanced 7 member Board of Directors with a wide array of expertise in various fields and representation from the public, private and civic sectors.

Formal Corporate Governance structures are in place in line with the By-Laws of the organisations and the Namibian Code of Corporate Governance (NamCode) to oversee Investment matters (Investment Committee) and Audit and Finance issues (Audit and Risk Committee).

The CEO heads the operational team (reporting to the Board) and is supported by a lean and efficient team of staff members together forming the organisation’s Secretariat.
